INNOVATION FORUM Medical Technology 2009 – 2nd Call

2. INNOVATION FORUM Medical Technology Tuttingen, June 23rd 09

The successful premiere took place in July 2008 – now there is a new issue: with the 2nd INNOVATION FORUM Medical Technology, **June 23rd 2009** in Tuttingen, the series will be continued. Organizer is the MicroMountains network in alliance with the local chamber of commerce and industry. The FORUM is arranged by innovation coach Dr. Mechthild Wolber and other partners as MITT, VDI, DGBMT and Steinbeis-Europa-Zentrum.

Conceptual Design

The iINNOVATION FORUM Medical Technology offers the possibility to all participants to establish contacts with researchers and developers close to the market. The speakers of institutes and companies have the chance that their product ideas are implemented directly oder indirectly into products.

Focus Point

Innovative concepts of all fields especially referring to the following contents are welcome:

- 1 Innovative Approaches in Surgery
- 2 Biomaterials and Implants
- 3 New Devices for Diagnosis and Therapy

Requirements to the Speakers

We demand for product-related research of all disciplines of Medical Technology. The ideas should demonstrate really new aspects concerning medical application or cost-saving. The concepts presented at the iINNOVATION FORUM should be capable of being promptly transferred into products in a MedTech company.

Participants of the iINNOVATION FORUM

Round about 100 selected managers and r&d-experts are expected. Most of them will be decision makers of MedTech companies that are looking for new products and markets. In particular, we expect a high number of participants of the MedTech CareArea in our region (Tutlingen-Tübingen).

Are you interested?

You can register your proposal with immediate effect or until **March 20th 2009** at the latest.
Further information: www.innovation-forum.eu.
On this site, you also can propose your contribution to the FORUM. We are looking forward to your proposals!
